## WORK EXPERIENCE

**The Green Estate CIC** - [greenestate.org.uk](https://greenestate.org.uk), 2023 - Present

The Green Estate CIC is an award-winning environmental & heritage social enterprise, specialising in place-based urban resilience.

**Head of Digital & Data** 2023 - Present

Working at the operational core to enable the organisation to make the best use of their digital tools and to work in a more data-driven way; to improve efficiency, increase innovation and future-proof the operation.

**Artlogic** - [artlogic.net](https://artlogic.net), 2014 - 2023

Artlogic is an industry leading art and technology company that makes SASS products for galleries and artists. Various roles held outlined below:

**Director of Product Engineering** 2023

Considering how the product engineering teams operate in a big-picture level, including processes, tools and culture. In addition to the responsibilities outlined below.

**Director of Artlogic Database Development** 2020 - 2023

Contributing to strategic business decisions at a director level in addition to owning the product development of the company's flagship product ([Artlogic Database](#)) including product delivery, team management and lead engineer duties.

**Head of Artlogic Database team** 2018 - 2020

Leading a growing team of developers on the Artlogic Database product as the lead engineer. Planning work, liaising with clients, supporting the team on implementation as well as full-stack web development of this product.

**Web Developer** 2014 - 2018

Python scripting of large-scale data transfers, full-stack web development for websites, support and feature development for a large-scale commercial web application.

**Web development, Freelance** 2012 - 2013

Development, deploying and hosting websites built on WordPress, primarily for individuals & small organisations in the creative sector.
